## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 14, drawn to forming a protective layer over the oscillator member, classified in class 29, subclass 841.
  - II. Claims 15-18, drawn to directing radiant energy at the oscillator member, classified in class 219, subclass 121.6.
  - III. Claim 19, drawn to continuously monitoring resonant frequency from the first to the second frequency by vibrating the oscillator member, classified in class 29, subclass 593.
  - IV. Claim 20, drawn to forming an empirical spaced-apart stack pattern upon a second oscillator member, classified in class 29, subclass 830.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I through IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each subcombination has separate utility, or a separately usable process, by itself.

Group I has a separately usable process of forming a protective layer not required in any of Groups II through IV.

Group II has a separately usable process of directing radiant energy not required in any of Groups I, III and IV.

Group III has a separately usable process of continuously monitoring resonant frequency from the first to the second frequency not required by any of Groups I, II and IV.

Group IV has a separately usable process of forming an empirical spaced-apart stack pattern upon a second oscillator member not required in any of Groups I through III.

See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for example in Group I, is not required for Groups II through IV, restriction for examination purposes as indicated is proper.

4. Claim 13 link(s) the inventions of Groups I through IV. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), Claim 13. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. Claims 26-28 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel

Art Unit: 3729

the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Each of Claims 26-28 depend from a previously canceled claim, i.e. Claim 1.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. Dexter Tugbang whose telephone number is 571-272-4570.

The examiner can normally be reached on Monday - Friday 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 571-272-4690. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
